

Accounting Module

Global Feature Specification — US · Middle East · Africa · Asia

■ United States	■ Middle East	■ Africa	■ Asia
-----------------	---------------	----------	--------

This document defines the full accounting feature set for **FLYN AI** — the all-in-one AI-powered business platform serving members across the **United States, Middle East (UAE, KSA, Egypt, Jordan), Africa (Ghana, Kenya, South Africa), and Asia (India, Philippines, Pakistan, Indonesia, Malaysia)**. FLYN AI's accounting module is designed to be the unified financial backbone connecting all platform apps — CRM, HR, Events, Coaches, Freelancers, Telephony, AI Agents, and eSIM — with region-specific compliance, payment methods, and tax rules built in from day one.

10	50+	4	20+	15+
Feature Areas	Sub-features	Global Regions	Countries	Currencies

1. Invoicing & Billing

Core revenue collection for all FLYN AI members — from eSIM resellers and coaches to churches, HR teams, and event managers. Supports the invoice formats and legal requirements of every operating region.

Invoice Builder	Drag-and-drop builder with custom line items, quantities, discounts, and multi-tax line support. Auto-populate client details from FLYN AI CRM.
Multi-Currency	Issue invoices in USD, AED, SAR, EGP, GHS, KES, ZAR, INR, PHP, PKR, IDR, MYR and more. Real-time FX conversion with base currency display.
Multi-Language	Invoice templates in English, Arabic (RTL layout), French (West Africa), Swahili, Hindi, and Bahasa. Auto-select based on client country.
Recurring Invoices	Schedule weekly/monthly recurring invoices. Auto-send with configurable reminders and late fee escalation.
Payment Links	Shareable payment links per invoice. Embed in WhatsApp CRM, SMS, or email. Routed to the correct local gateway per region.
Partial Payments	Accept and track partial payments. Display outstanding balance. Auto-close on full settlement.
Credit Notes	Issue credit notes for refunds or adjustments. Linked to original invoice for full audit trail.

Pro Forma Invoices	Generate pro forma invoices for customs and cross-border shipments — critical for Africa and Asia trade flows.
Region	Details
United States	Include EIN/Tax ID. Support W-9 attachment. Net 30/60 payment terms. IRS-compliant invoice format.
Middle East	Arabic RTL layout. TRN mandatory on UAE/KSA invoices. Hijri date option. ZATCA QR code (KSA).
Africa	GRA TIN (Ghana), KRA PIN (Kenya), SARS VAT number (South Africa). Mobile money payment instructions printed on invoice.
Asia	GST/HSN codes (India), BIR OR number (Philippines), NTN (Pakistan). QR code for India e-invoicing IRP verification.

2. Payments & Collections

Payment infrastructure is the most region-critical component of FLYN AI accounting. The platform must route through locally trusted gateways and support mobile money, which is the dominant payment channel across Africa and much of Asia.

Smart Gateway Routing	Auto-route payment requests to the best available gateway per member's region. Fallback logic if primary gateway fails.
Auto-Reconciliation	Match incoming payments to open invoices automatically. Flag unmatched deposits for manual review.
WhatsApp Pay	Request and confirm payment inside a FLYN AI WhatsApp CRM conversation. Customer pays without leaving the chat.
Dunning Management	Automated overdue sequences via email, SMS, and WhatsApp. Configurable escalation timeline per region.
Accounts Payable	Track vendor bills, schedule payment runs, and approve before execution.
Bulk Payments	Pay multiple vendors or employees in one batch. Export to ACH (US), SWIFT (global), WPS (UAE), or local bank format.
Region	Details
United States	Stripe, PayPal, Square, ACH bank transfer, Apple Pay, Google Pay, Plaid bank link
Middle East	Tap Payments, Telr, Moyasar, PayTabs, Hyperpay, SADAD (KSA), Fawry (Egypt), IBAN bank transfer
Africa	Hubtel (Ghana), Zeepay (Ghana), Flutterwave, MTN MoMo (Ghana/Kenya), Airtel Money, M-Pesa (Kenya), Ozow (South Africa)
Asia	Razorpay/UPI (India), GCash/Maya (Philippines), EasyPaisa/JazzCash (Pakistan), GoPay/OVO (Indonesia), FPX (Malaysia)

3. Tax & Compliance

FLYN AI operates across 20+ countries with fundamentally different tax systems. The compliance engine handles US sales tax, UAE/KSA VAT, Ghana GRA VAT, Indian GST, and KSA ZATCA e-invoicing — all within a single configurable tax framework.

Multi-Tax Engine	Support VAT, GST, Sales Tax, WHT, and Service Charge simultaneously. Apply per invoice line or globally per client/country.
Tax Code Library	Pre-built tax codes per country. Auto-suggest based on member's registration location and client country.
E-Invoicing Framework	Pluggable e-invoicing adapters per country. New country compliance added without rebuilding core logic.
Audit Trail	Immutable log of every transaction, edit, deletion, and approval. Timestamped with user ID. Always exportable.
Document Retention	Auto-archive invoices, receipts, and contracts per local retention laws. Fully searchable.

Country	Tax Types	Compliance Requirements
United States	Sales Tax, FICA, 1099	Avalara/TaxJar multi-state sales tax. 1099-NEC auto-generation. W-9 collection workflow.
UAE	VAT 5%	VAT 201 return. FTA-compliant export. TRN validation. 5-year document retention.
Saudi Arabia	VAT 15%, Zakat	ZATCA Phase 2 e-invoicing (signed XML + QR). Portal submission. Zakat calculation.
Egypt / Jordan	VAT 14% / 16%	ETA e-invoice integration (Egypt). VAT return export in authority format.
Ghana	VAT 15%, GET 2.5%, WHT	GRA TIN registration. VAT standard rate 15% + Ghana Education Trust Fund 2.5%. WHT on applicable payments. GRA e-levy compliance. VAT return (VAT Standard Form) export.
Kenya	VAT 16%, WHT	KRA iTax. ETR receipts. P9 form for payroll tax.
South Africa	VAT 15%	SARS VAT201. 14-digit invoice number. VAT registration number on invoice.
India	GST 0–18%	IRP e-invoicing portal. HSN/SAC codes. GSTR-1 & GSTR-3B auto-fill. TDS deduction.
Philippines	VAT 12%, WHT	BIR EIS e-invoicing. OR/CR number. Quarterly VAT return (2550Q).
Pakistan	GST 17%, WHT	FBR IRIS integration. NTN on invoices. Monthly ST-7 sales tax return.
Indonesia/Malaysia	PPN 11% / SST 6%	Indonesian e-Faktur. Malaysian MyInvois e-invoicing (2024 mandate).

4. Expense Management

Track, categorize, and reimburse all outgoing costs. Especially important for church and NGO members in Ghana managing donor funds, and SMEs across Asia with distributed field teams.

Receipt Capture (OCR)	Upload receipts via mobile camera or email. OCR auto-extracts vendor, amount, date, category. Offline-first — syncs on reconnect. Critical for Africa/Asia low-connectivity regions.
Expense Categories	Customizable per member type: 'Ministry Supplies' (Church), 'Data Procurement' (eSIM), 'Field Agent Travel' (Ghana/Kenya), 'Client Entertainment' (US/ME).
Approval Workflows	Multi-level approval chains. Mobile-first — approve expense claims by WhatsApp notification. Manager approves before reimbursement processes.
Mileage & Per Diem	GPS mileage tracker with IRS rate (US) or configurable km allowance (ME/Africa/Asia). Per diem rules by country and role.
Petty Cash	Track petty cash float in local currency (GHS for Ghana). Threshold alerts. Essential for Africa/Asia where cash is still primary.
Vendor Management	Vendor directory with payment terms, multi-currency bank details, and spend history. Synced with FLYN AI CRM.
Donor Fund Tracking	Ring-fence expenses against specific donor grants or project codes. Essential for NGOs and churches in Ghana operating on restricted funding.

5. Payroll Management

Payroll rules vary dramatically across FLYN AI's operating regions. A single configurable payroll engine handles UAE WPS, US multi-state payroll, Ghana PAYE/SSNIT, Indian EPF/ESI, and more — all linked directly to the FLYN AI HR module.

Payroll Runs	Monthly/bi-weekly/weekly cycles. Auto-calculate gross, statutory deductions, and net pay per employee based on local rules.
Payslip Distribution	Branded digital payslips by email or in-app. PDF format. Available in local language per region.
Leave & Overtime	Auto-deduct unpaid leave and apply overtime from FLYN AI HR module attendance. Overtime rules configurable per country law.
End-of-Service Benefits	Calculate gratuity and EOSB per local labour law. Rules engine configurable per country.
Contractor Payments	Manage freelancer/contractor payment schedules. Link to project milestones from FLYN AI Freelancers module.

Region	Details
United States	Federal + state income tax withholding. FICA (SS 6.2% + Medicare 1.45%). Multi-state payroll for remote teams. W-2 at year-end. ADP/Gusto integration option.

Middle East	WPS SIF file (UAE Central Bank compliance). GOSI contributions (KSA). No income tax. Gratuity per UAE Labour Law. EOSB lump sum calculation.
Africa	PAYE via GRA (Ghana) — auto-calculate personal income tax bands. SSNIT 13% employer + 5.5% employee contributions. Tier 2 & Tier 3 pension. MTN MoMo payroll disbursement (GHS). NHIF/NSSF contributions (Kenya).
Asia	EPF 12% + ESI 3.25% (India). SSS/PhilHealth/Pag-IBIG (Philippines). EOBI (Pakistan). BPJS Ketenagakerjaan (Indonesia). PCB tax (Malaysia). UPI payroll.

6. Financial Reporting & Analytics

Real-time financial visibility across all FLYN AI apps and regions. Reports filterable by region, currency, date, client, project, and module. All reports exportable to PDF and Excel.

Profit & Loss	Income vs. expenses for any period. Drill down by category, client, project, or FLYN AI app module. YoY and MoM comparison.
Multi-Currency P&L;	View P&L; in any currency including GHS (Ghana Cedi). FX gain/loss line. Consolidated group P&L; across multi-country entities.
Cash Flow Forecast	30/60/90-day forecast of inflows vs. outflows. Critical for members managing USD-denominated eSIM costs against local currency revenue.
Revenue by FLYN AI App	Break down income by module: eSIM sales, coaching sessions, event tickets, freelance projects, CRM deals.
AR Aging Report	Outstanding invoices by days overdue (0–30, 31–60, 61–90, 90+). Flag high-risk accounts by region.
Tax Summary Report	Aggregate taxes collected per period, per country. Export in each authority's required format (GRA for Ghana, KRA for Kenya, etc.).
FX Revaluation	Auto-revalue foreign currency balances at period-end rates. Post FX gain/loss journals.
Custom Report Builder	Drag-and-drop KPI builder. Members define their own metrics and save as dashboard widgets.

7. Bank & Account Management

Connect real bank accounts and mobile money wallets for live balance visibility and automatic transaction import. Covers traditional banking in the US and ME, and mobile money infrastructure dominant across Africa and Asia.

Bank Feed Integration	Auto-import transactions daily via Open Banking APIs. CSV upload fallback for banks without API access.
Bank Reconciliation	Match bank transactions to FLYN AI invoices and bills. One-click confirm or reassign exceptions.
Multi-Account / Multi-Currency	Manage multiple bank accounts, mobile money wallets, and e-wallets. Consolidated balance view in any base currency.
Mobile Money Wallets	Track MTN MoMo (Ghana), Vodafone Cash (Ghana), AirtelTigo Money (Ghana), M-Pesa (Kenya) balances as FLYN AI accounts. Reconcile receipts to invoices.
Petty Cash	Cash float per location in GHS/KES/ZAR. Threshold alerts. Withdrawal and replenishment records.
Intercompany Transfers	Record transfers between FLYN AI-connected accounts without double-counting in P&L;

Region	Details
United States	Plaid bank link, Chase, Bank of America, Wells Fargo, Mercury, Brex. ACH and wire transfer tracking.
Middle East	Emirates NBD, ADIB, Mashreq, FAB (UAE). Riyad Bank, Al Rajhi, SNB (KSA). CIB, NBE (Egypt). IBAN payment matching.
Africa	GCB Bank, Ecobank, Absa, Stanbic (Ghana). Equity/KCB (Kenya). Standard Bank/FNB (South Africa). MTN MoMo, Vodafone Cash, AirtelTigo Money (Ghana) wallet feeds.
Asia	HDFC/ICICI/SBI (India). BDO/BPI (Philippines). HBL/MCB (Pakistan). BCA/Mandiri (Indonesia). Maybank (Malaysia). UPI transaction import.

8. Subscription & Plan Billing

Automates recurring revenue for eSIM resellers, coaches, and any FLYN AI member running a subscription business. Supports localized pricing and local payment methods per region.

Plan Builder	Create tiered plans (e.g., eSIM 1GB/5GB/Unlimited). Pricing per region in local currency. Billing cycle, trial period, and feature flags per plan.
Auto-Billing	Charge on renewal via saved local payment method. Retry logic for failed payments (1, 3, 7 days). WhatsApp notification on failure.
Usage-Based Billing	Meter data usage, API calls, or session counts. Bill at period-end on actual consumption. Core for eSIM data plans.

Localized Pricing	Different price points per country for the same plan. E.g., eSIM plan: \$10 (US) / AED 37 (UAE) / GHS 120 (Ghana) / INR 850 (India) — all from one plan config.
Proration	Auto-calculate pro-rated charges on mid-cycle upgrades or downgrades.
Coupon & Discount Engine	Promo codes with %, fixed, or regional discounts. Expiry dates and usage caps. Apply at checkout or invoice level.
Churn Analytics	Track MRR, ARR, churn rate, and LTV by plan and region. Identify at-risk subscribers before cancellation.

9. Integrations & FLYN AI Ecosystem

Accounting must be the financial backbone of the entire FLYN AI platform — not a standalone module. Deep integration across all apps turns every workflow into an automatically reconciled financial event.

CRM	Auto-generate invoice from a won deal. Sync payment status back to CRM contact record in real time.
WhatsApp CRM	Send invoice links and payment reminders via WhatsApp. Confirm payment within the conversation.
HR Module	Pull headcount, attendance, and leave for automated payroll calculations. Zero duplicate entry.
Events Module	Auto-invoice ticket sales and sponsorships. Reconcile event revenue against costs in real time.
Coaches Module	Auto-bill completed sessions. Integrate with booking calendar for revenue recognition timing.
Freelancers Module	Trigger invoices on project milestone approval. Auto-track project profitability per client.
Telephony & AI Agents	Log call and AI agent costs against client/project for full profitability view.
External: Xero / QuickBooks	Two-way sync for members on Xero or QuickBooks. FLYN AI as operations layer, external tool as general ledger.
Zapier / REST Webhooks	Trigger accounting events from any external tool. E.g., Shopify order → FLYN AI invoice.
Open API	Full REST API. Webhooks for invoice created, payment received, overdue escalated, payroll run completed.

10. Roles, Permissions & Multi-Entity

Global FLYN AI members managing multiple businesses across multiple countries need strict access control and the ability to consolidate financials under one login.

Role-Based Access	Predefined roles: Admin, Accountant, Manager, View-Only. Custom roles with granular permissions per feature area.
Approval Chains	Configurable spend thresholds. E.g., invoices over \$5,000 require CFO approval before sending.
Multi-Entity	Manage multiple legal entities (e.g., FLYN AI US LLC + FLYN AI UAE FZE + FLYN AI Ghana Ltd) under one login. Consolidated group P&L; with intercompany eliminations.
Intercompany Transactions	Record and auto-eliminate intercompany invoices in consolidated group financials.
Accountant Invite	Invite external accountant with time-limited, read-only or export-only access. Auto-expires on set date.
Regional Data Residency	Store financial data on region-specific servers (US, ME, Africa, Asia) for local data sovereignty compliance. Ghana Data Protection Act compliant.
Export Controls	Restrict who can export raw financial data. All exports logged with timestamp, user ID, and IP.

Recommended Global Rollout Priority

Phase	Features	Region Priority	Timeline
MVP	Invoicing, Payments, Multi-currency, Basic Reporting	All 4 regions simultaneously	Month 1–2
Phase 2	Tax Compliance (VAT/GST/Sales Tax), Bank Feeds, Expenses	US + ME first; Africa (Ghana/Kenya) + Asia with local configs	Month 3–4
Phase 3	Payroll (SSNIT/GRA for Ghana), Subscriptions, App Integrations	All regions — payroll rules per country	Month 5–7
Phase 4	Multi-entity, E-invoicing (ZATCA/IRP/BIR), GRA e-levy	ME (ZATCA), Asia (IRP/BIR/FBR), Africa (GRA Ghana, KRA Kenya)	Month 8–10

Architecture note for dev team: Build accounting with a **country-config layer** — tax codes, payroll rules, payment gateways, invoice formats, and e-invoicing adapters must all be configurable per country without touching core logic. Ghana-specific requirements include: **GRA TIN validation**, **SSNIT contribution calculations**, **GHS currency handling**, **MTN MoMo/Vodafone Cash/AirtelTigo Money wallet feeds**, and **Ghana Data Protection Act** compliance for financial data storage. Design for **offline-first** mobile usage across Africa and Asia where connectivity is intermittent.
